# Highlights

## MU-MIMO for 3× Faster Connections

MU-MIMO technology serves up to three devices at once, reducing wait time, increasing Wi-Fi throughput for every device, and making each stream more efficient.

**Traditional Router**  
Sends data to one device at a time

**MU-MIMO Router**  
Simultaneously sends data to multiple devices

## Range Boost for Better Whole Coverage

Range Boost greatly improves the routers ability to detect devices that are further away or low-powered, giving your network even greater coverage.

**without Range Boost**  
Can not receive weak signals

**with Range Boost**  
Greatly expands receive coverage

\*NitroQAM™ technology by Broadcom®  
\*Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and wireless coverage are not guaranteed and will vary as a result of 1) environmental factors, including building materials, physical objects, and obstacles, 2) network conditions, including local interference, volume and density of traffic, product location, network complexity, and network overhead, and 3) client limitations, including rated performance, location, connection, quality, and client condition.  
\*Use of MU-MIMO and 1024-QAM requires clients to also support those functions.  
\*A basic TP-Link HomeCare™, powered by Trend Micro™, package is included for 3 years from date of activation at no additional cost. It includes Parental controls, Quality of Service, and Antivirus. Deactivation of HomeCare™ will disable certain controls and protections. For a complete list of HomeCare™ functions, go to [www.tp-link.com](http://www.tp-link.com).
