Nighthawk® X6S Tri-Band WiFi Mesh Extender

The NETGEAR patented FastLane3 Technology is comprised of Tri-band WiFi that creates a dedicated WiFi link between the extender and router and an optimized antenna design in the extender, giving you more speed to more devices. These elements combined create a powerful solution to extend WiFi throughout your home.

FASTLANE	FASTLANE3 Technology
This feature maximizes performance by limiting devices to a specific band. Front haul is always one band, however the backhaul is not always 5GHz.	This feature maximizes performance by limiting devices to a specific band. Front haul has two bands, backhaul is usually 5GHz. Thereby ensuring that all your devices operating on 5Ghz network have a dedicated WiFi connection.
FastLane needs to be enabled in the GUI.	In Nighthawk X6S Tri-band WiFi range extender FastLane3 Technology is automatically enabled.

[†]Works with devices supporting WPS.

[‡]Comparable with an AC1200 WiFi Range Extender.

[‡]Maximum wireless signal rate derived from IEEE® standard 802.11 specifications. Actual data throughput and data over distance will vary. Network conditions and environmental factors, including volume of network traffic, building material and construction, and network overhead, result in lower actual data throughput rate and wireless coverage. Data throughput, signal range, and wireless coverage distances are not guaranteed and may vary due to differences in operating environments of wireless networks, including without limitation building materials and wireless interference. Specifications are subject to change without notice. The product may not be compatible with routers or gateways with firmware that has been altered, is based on open source programs, or is non-standard or outdated.
